Trinational Round Table: Artificial Intelligence

The **Trinational Round Table** on artificial intelligence (AI) supports the networking of artificial intelligence experts from Czech, German and Austrian universities and presents the latest research results in the field of machine learning and related technologies.

Join us on **April 23, 2026** at the **University of West Bohemia in Pilsen** and discuss the different **research fields** of artificial intelligence and its **applications** with other scientists. In addition to **scientific short presentations**, there will be ample time for discussion. The language of the Trinational Round Table is English.

About the main organiser of the event:

Europaregion Donau-Moldau

The trilateral association Europaregion Donau-Moldau (EDM) is striving for close cooperation between its seven member regions from Czech Republic, Germany and Austria to further develop the EDM and implement European ideas.

Further information: www.euoparegion.org

KI Campus Ostbayern

The KI Campus Ostbayern is a cooperation platform with which the Eastern Bavarian universities bundle their competencies on the topic of artificial intelligence, strengthen scientific exchange and expand cooperation with business and society.
